

Product Use

Flintlastic® GTA and GTA-FR are designed for use as roofing membranes over various types of substrates for both new construction and re-roofing installations. It is suitable for large or small low slope roof decks and may be used for roof system flashings including wall treatments, base flashings and field flashings.

- Flintlastic GTA is intended for torch application only and should not be exposed to adhesives or solvent-based materials.
- Use as a cap sheet.
- Available in multiple colors, including CoolStar™ (energy saving, solar reflective surfacing).
- Fire-retardant version (GTA-FR) available for enhanced fire resistance.
